10 & 15 MIL VAPOR BARRIERS

PRODUCT DESCRIPTION

Vapor Barrier Yellow 10 and 15 mil poly is a high performance, multi-layer, polyolefin based, below slab vapor barrier. It is manufactured with state of the art polyolefin resins specifically designed to ensure low permeability, high tensile strength, and superior puncture resistance.

Vapor Barrier Yellow 10 and 15 mil poly is manufactured in the USA.

APPLICATIONS

- ▶ Vapor Barrier
- ▶ Underslab Vapor Barrier
- ▶ Wall Vapor Barrier
- ▶ Foundation Wall Barrier

PRODUCT USE

Vapor Barrier Yellow is designed to suppress the transmission of water vapor penetration through concrete slabs on grade. It is also an effective product for impeding vapor migration through foundation walls to reduce mold, mildew, and fungus from penetrating the concrete foundation foundation.

INSTALLATION INSTRUCTIONS

Refer too ASTM 1643 which covers standard practice for installation of water vapor retardants used in contact with earth or granular fill under concrete slabs. Install Vapor Barrier Yellow over the prepared site with the longest dimension parallel to the direction of the pour of concrete. A minimum 6” overlap is highly recommended for all of the joints and seams using heavy duty 4” vapor tape.
